PROFILE

Self-motivated and very passionate about iOS development. In the span of my career, I have developed 5 apps currently in the App Store.

EXPERIENCE

Autotrader, Atlanta, GA

iOS Developer **November 2014 to present**

- Developer on Autotrader iOS application within a team following Scrum methodologies.
- Built internal Podspec repository and reusable iOS SDK for company's REST API.
- Won first place in company's hackathon by creating a watchOS companion application.
- Maintained Autotrader's Trade-In Tool for Dealers iOS app.

AirWatch, Atlanta, GA

iOS Developer **January 2013 to November 2014**

- Lead developer on two iOS applications. Conducted code reviews in order to maintain code quality. Was fully involved with every aspect from planning a feature with PM, development, localization, App Store submission, etc.
- Browser, an alternative to Safari that provides higher level of customization as well as the ability to VPN into internal websites. (Customized UIWebview, NSURLProtocol)
- Chat, a secure messaging application with Active Directory integration (Core Data, WebSockets)

Hewlett Packard (Internship), Austin, TX

Supply Chain IT Intern **June 2012 to August 2012**

- Designed and developed a Silverlight demand capacity dashboard for resource managers to easily detect over or under-taxing of employees

AT&T (Full-time), Atlanta, GA

Applications Developer **June 2010 to September 2011**

- Developed and supported Java web services features for an AT&T enterprise network provisioning and inventory system
- Expanded an Arduino development program to Atlanta with the Junior Achievement
- Produced and edited a fundraiser production with AT&T management and raised over $7000 for United Way
- Awarded *Social Innovator* for contribution to AT&T U-verse

EDUCATION

Georgia Institute of Technology, Atlanta, GA

M.S., Computer Science specializing in Machine Learning, December 2012

Research Assistant, comp.social lab **January 2012 to December 2012**

B.S., Computer Science, May 2010

Teaching Assistant, College of Computing **January 2009 to May 2010**

SKILLS

- Objective−C, Swift (beginner), Xcode, watchOS, Core Data, Cocoapods
- TeamCity, Stash, Git, SourceTree, JIRA, Agile/Scrum, Code Reviews

PERSONAL
WORK

The Idiot Box (iOS App)
- Track the progress on your TV shows. Get notifications of new episodes before they air.
